EDUCATION

The University of Texas at Arlington - College of Business | Arlington, TX
Bachelor of Science in Information Systems | SEOTY Award Recipient (2025–2026), Deans List

August 2023 - May 2026

EXPERIENCE

HardScope | Remote

June 2026

Incoming Business Systems Engineer

Data Analytics & Insights Intern

November 2025 - Present

- Built a live analytics dashboard web app using API endpoints, enabling real-time visibility into 10+ creator campaigns, system health, and performance metrics for internal/client teams
- Collaborated with external partners to design a cloud-based (Google BigQuery) unified data layer integrating 7+ vendor APIs, centralizing fragmented social media and audience intelligence data for faster cross-platform reporting and analysis
- Supported sales by creating data-backed storylines for 3+ partnership pitches (Cash App, Underdog), using YouGov and audience-intel tools to analyze FaZe demographics and crossover interests, improving partner targeting accuracy by 40%
- Built an internal Slackbot for real-time social media analytics queries, reducing manual insight requests by 30%

University of Texas at Arlington | Arlington, TX

September 2025 - May 2026

Student Assistant - College of Business Ambassador

- Engaged 300+ students at 3+ community events, supporting outreach through tours, calls, and letters
- Maintained and updated 1,000+ student records monthly in the CRM system (Slate) to ensure communication and follow-up
- Selected as UTA Exemplary Student Employee of the Year, earning a \$1,250 scholarship for outstanding campus impact

Medline Industries, LP | Northbrook, IL

June 2025 - August 2025

IT Business Systems Intern

- Developed a centralized App to manage 100+ configuration flags in the Warehouse Management Systems database
- Delivered 3+ executive presentations proposing the application as a reusable standard framework for database configuration
- Revamped and implemented an approval workflow, ensuring 100% traceability and auditability of configuration changes
- Collaborated with a team of 5 to build the front end (React, HTML, CSS, JavaScript) and back end (Java, Spring Boot) with Azure integration and a proxy-based connection to the database, ensuring real-time configuration management

PROJECTS

InsighT (Winner 2nd Place) | [GitHub](#) | [Devpost](#)

November 2025

HackUTD 2025

- InsighT is a full-stack Next.js, React, TypeScript, and Supabase platform that unifies seven data sources to deliver real-time CHI, regional pain-point mapping, and an AI-powered workbench for PRDs and user stories. Built at HackUTD'25, North America's largest 24-hour hackathon, placed 2nd in the T-Mobile track among 1,100+ participants

Calmē (Bronze 3rd Place) | [PowerPoint](#) | [Paper](#)

October 2025 - November 2025

Maverick Marketing Intelligence Competition 2025

- Developed a culturally grounded, energy-focused beverage concept addressing Gen Z's burnout and dissatisfaction with "fake energy" products, using student survey data and market research to identifying a balanced, clarity-driven performance

UT Arlington MSA Website | [GitHub](#) | msaatuta.org

August 2025 – May 2026

Muslim Student Association

- Built and deployed a user-friendly website (HTML/CSS/JS) with events, donations, and member registration, improving accessibility and engagement for 200+ students while streamlining communication and outreach for the MSA community
